Thank You!

Data Ltd Inc. would like to thank you for selecting the DLI 9200. The DLI 9200 was designed as a forward thinking product that is modular in design and upgradeable. We thank you, the customer, for giving us the inspiration for the following features:

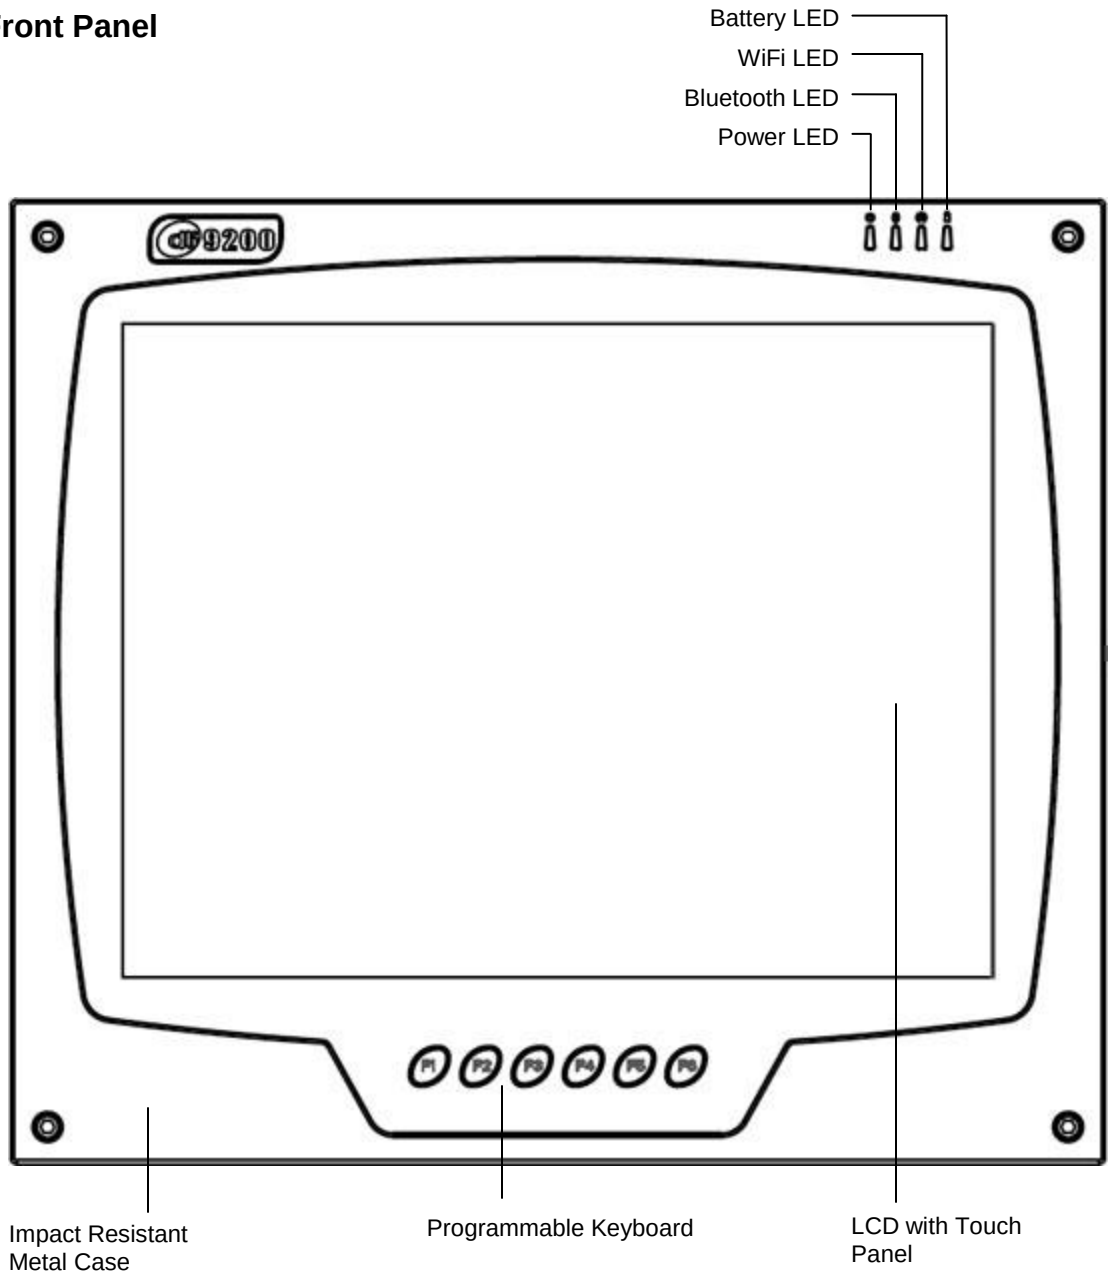
- Impact Resistant Case
- Integrated Backup Battery with 10~60V DC/DC Converter
- Integrated four radio technology (WiFi, Bluetooth, GPS, and Cellular)
- 12” or 15” Industrial-rated touchscreen
- Dual external WiFi antennas and external Bluetooth antenna
- Boot media via SSD (Solid State Drive)

DLI 9200 Peripherals and Accessories

5421112020900P	AC Adapter with Line Cord (not included)
6708260000000P	Cigarette Lighter Adapter for charging the unit in a vehicle
3431182037500P	Power cable, 3 prong locking connector with 5 AMP (bare leads)
5400020	DLI Surge Suppressor
46011140010010	WiFi Antenna

Hardware Overview

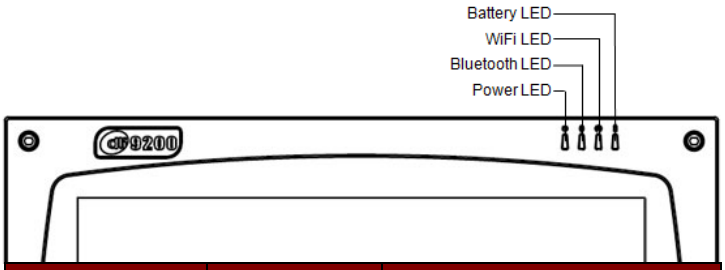
Front Panel



Front Panel Status Indicator Lights

The front panel includes status indicator lights for the following:

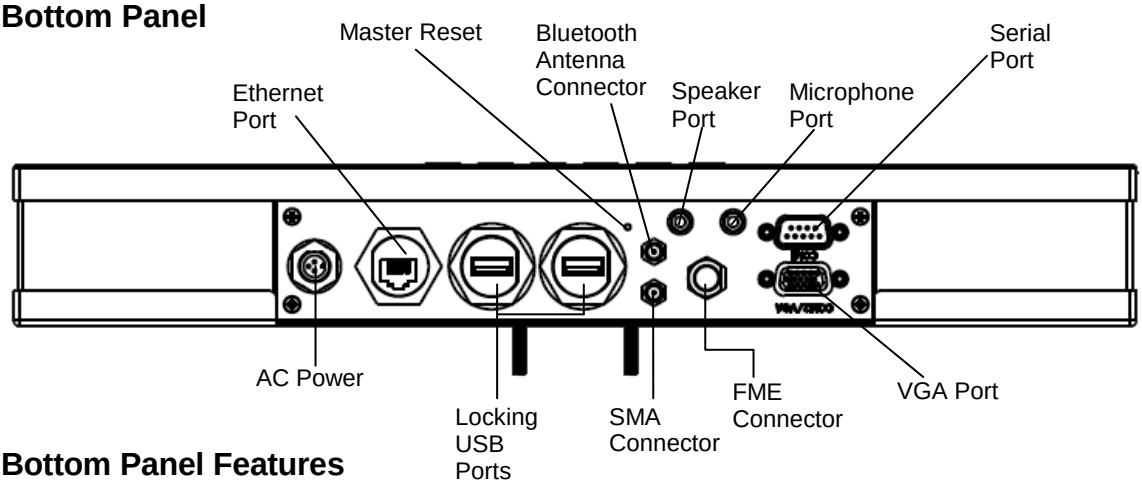
- Power On / Off
- Bluetooth
- WiFi
- Battery



Indicator Light	Status	Description
Power	Solid Green	Powered On
Bluetooth	Blinking Blue	Enabled
	No Light	Disabled or Not Available
WiFi	Green Light	Connected
	No Light	No Connection
Battery Status		Refer to Battery Status LED section. Page 9

Top Panel

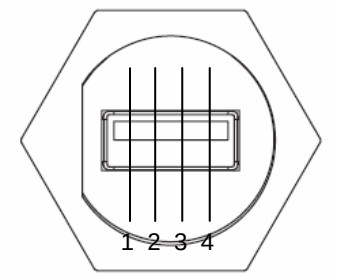
Bottom Panel



Bottom Panel Features

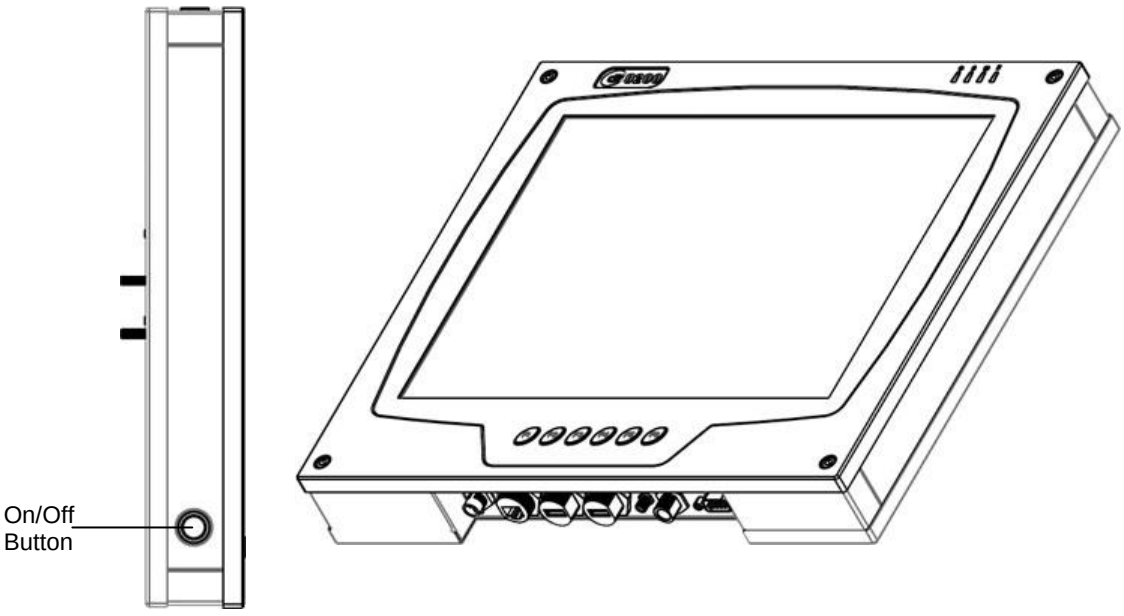
- Master Reset button. This forces a hard reset.
- Standard Ethernet Port (RJ-45)
- Standard Serial Port (RS-232 DB9) See Page 26.
- Standard Audio Ports (Speaker and Microphone Port)
- VGA Port (Video Out)
- Optional SMA Connector for External GPS
- Optional External FME Antenna Connector
- Standard locking USB, industrial grade connectors. Only DLI authorized peripherals should be attached to these USB ports. The USB port power is rated to 1A.

USB Port

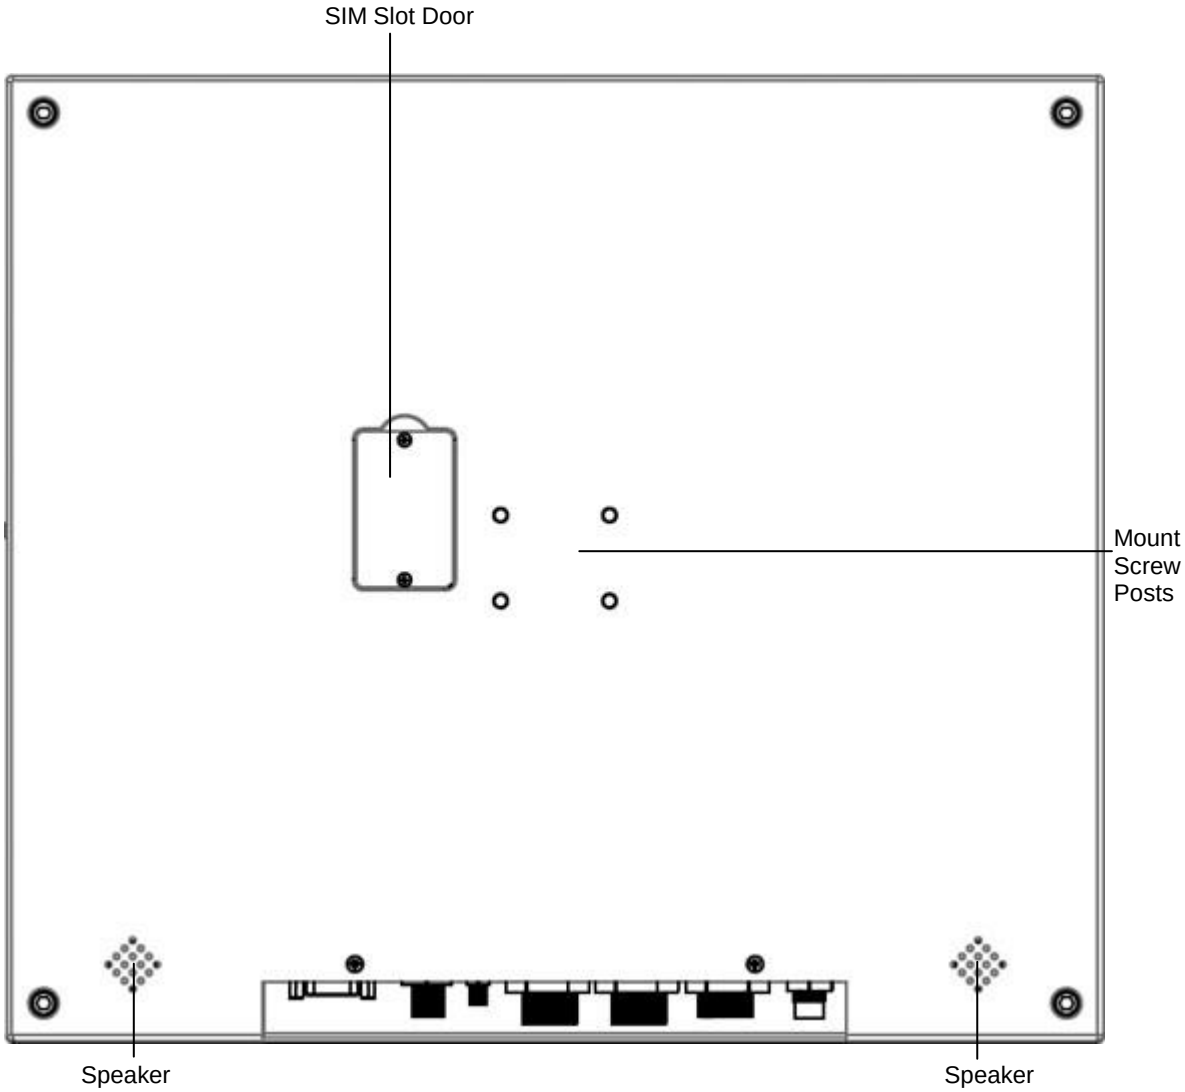


Pin #	Description
1	(+5V)
2	Data +
3	Data -
4	GND

Side Panel



Back Panel



Setting Up the DLI 9200 Terminal

1. Unpack the carton and verify its contents. – Page 9
3. Charge the main battery for 2hrs.
4. Power on the terminal via the power button on the left side of the terminal.
5. Let the device load and end on the Desktop screen.

*Default BIOS password is **qwerty***

Unpack the Carton and Verify its Contents

Verify that the carton contains the following items:

- DLI 9200 Industrial Tablet Computer (terminal)
- DLI 9200 Quick Reference Start Guide

If you ordered peripherals and/or accessories, verify that they are also included with the order.

Be sure to keep the original packaging in case the DLI 9200 needs to be returned for service– See page 31.

Battery Status LED's

On Power Source (Charger)

Battery Indicator Light	Status	Description
Power	Solid Green	Powered On
Battery	Solid Green	Capacity level = 100%
	Blinking Green	Capacity level > 70%
	Blinking Yellow	Capacity level > 20% - < 70%
	Blinking red	Capacity level < 20%

Off Power Source (No Charger)

Battery Indicator Light	Status	Description
Power	Solid Green	Powered On
Battery	Solid Green	Capacity level > 70%
	Solid Yellow	Capacity level < 70% - > 20%
	Solid Red	Capacity level < 20% - > 10%
	Blinking red	Capacity level < 10%

For charging, use only Data Ltd. Inc., DLI 9200 peripherals and the power cables. Use of peripherals or cables not sold/manufactured by Data Ltd will void the warranty and may damage the terminal.

Charging the Battery in the DLI 9200

1. Connect the DLI 9200 to the power supply provided by Data Ltd.
2. The battery will begin charging immediately
3. Charge the battery for two hours, then power on the terminal.

Due to the nature of Lithium Ion, be sure to periodically charge your batteries, as months of inactivity can have a long-term negative effect on the life of the battery.

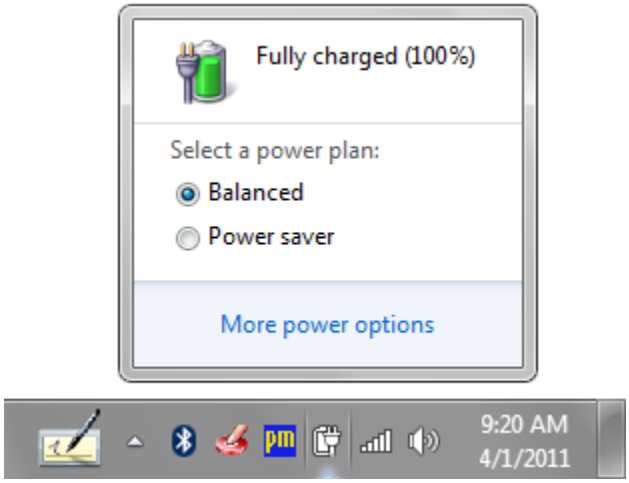
The battery will charge even if the terminal is in use as long as AC is applied to the terminal.

Checking the Battery Power

The main way to check the battery power on the DLI 9200 is to use the battery icon. It provides a graphical representation of the remaining battery power.

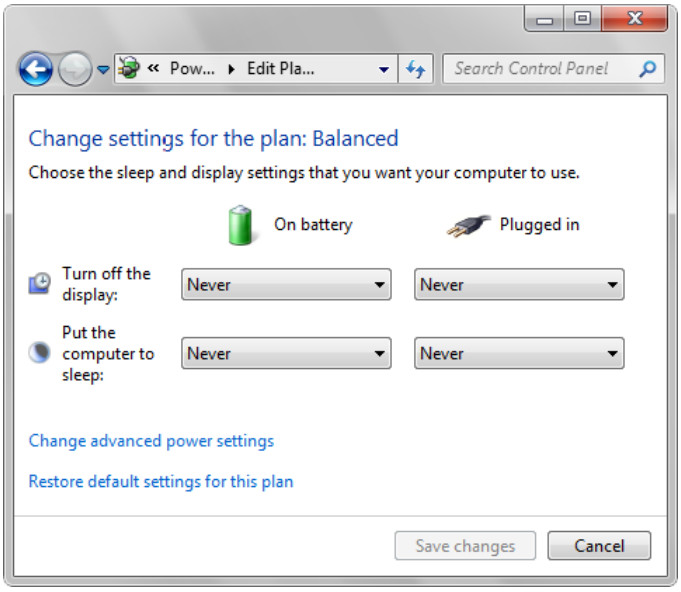
- Tap on the battery icon in the system task bar.

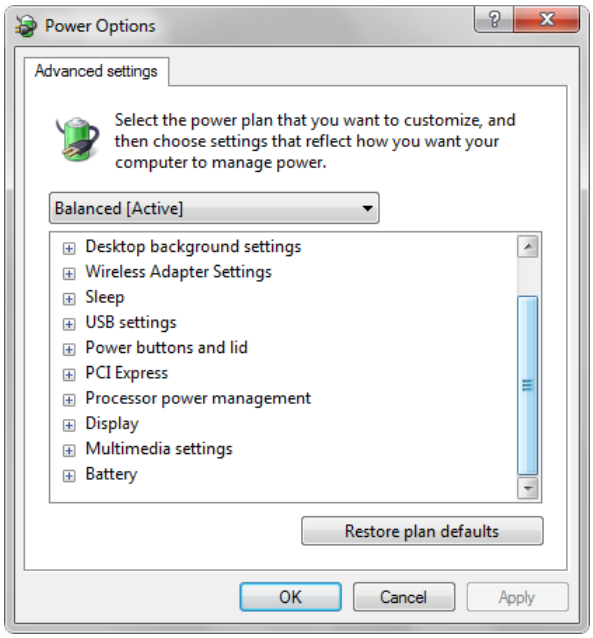
- Tapping the battery icon once will show the battery life percentage and default / premade Power Plans.



Power Management Utility

The DLI 9200 includes a comprehensive suite of power management functions. The power management is based upon the ACPI Standard (Advanced Configuration and Power Interface Specification) and is operated within the Embedded Controller (EC) at low level management. A graphical interface is supplied so that customer specific power plans can be controlled. The Power Management Utility is accessible from the DLI Control Center application as well as from the **control panel** within Windows.





Optional Auto Power On & Off Setup

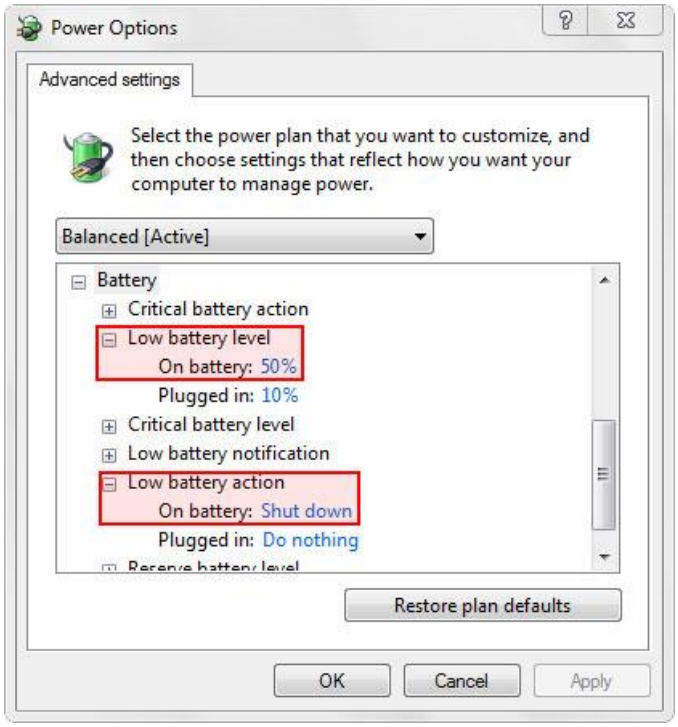
Your device can be set to power on when external power is detected via the BIOS and powered off at a certain battery percentage via the Operating System.

To enable the Auto Power On feature please contact DLI Technical Support, 800.526.1299 x774.

To enable the Auto Power Off feature based on battery percentage:
Tap Start>Control Panel>Power Options.
Select Change Plan Settings under the current Power Plan. This will bring up the Sleep and Display settings (shown above on the left). Now select Change Advanced Power Settings (shown above on the right).

(Continued on page 12.)

Select Battery to expand the options (shown below).



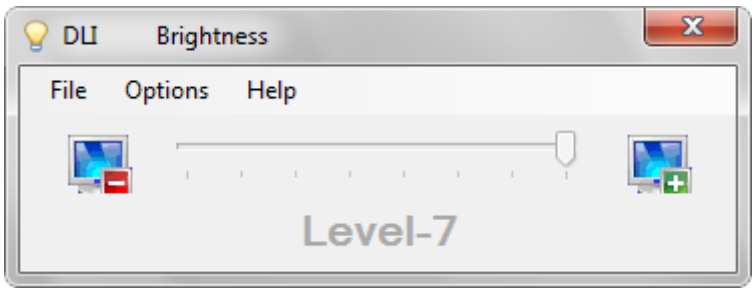
Select **Low battery level** and give the **On battery** a percentage. 50% is what is shown; this number can be changed to better fit the needed requirements.
After selecting a low battery level, now select a **Low battery action**. Select **Shut** down for **On Battery**. Select Apply and OK.
Once external power is removed (i.e. a forklift or a vehicle is turned off) the device will run off the internal battery until it reaches the Low battery level set above and perform the set action.

Adjusting the Backlight

Brightness levels of the liquid crystal display (LCD) are adjustable based on the lighting conditions. By default the level is set to 7. (0 being the lowest and 7 being the highest level) To adjust the level of backlight:

Start>Control Panel. Choose the DLI Brightness icon. DLI Brightness

Tap "–" or "+" to adjust the brightness. The settings are **auto saved** after adjustment.
Tap Options>Place in system tray for quick access to this utility.



Using the Stylus

Calibrating and Using the Stylus

Calibration ensures the accuracy of the stylus and adjusts the input angle for each person who uses it. The terminal stores calibration data and settings on a per-user basis.

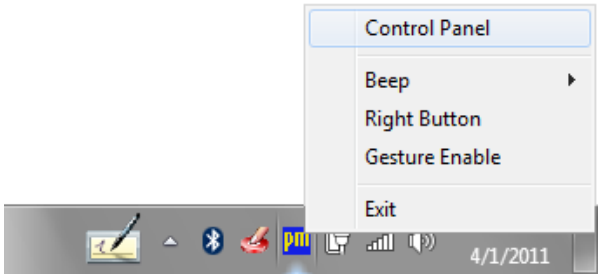
The stylus functions as a mouse; generally, a tap is the same as a mouse click.

Tap: Tap the touch screen once to open menu items and select options.
Drag: Hold the stylus on the screen and drag across the screen to select text and images. Drag in a list to select multiple items.
Right Mouse Click: Holding down the stylus for 3 seconds will activate the right mouse click.

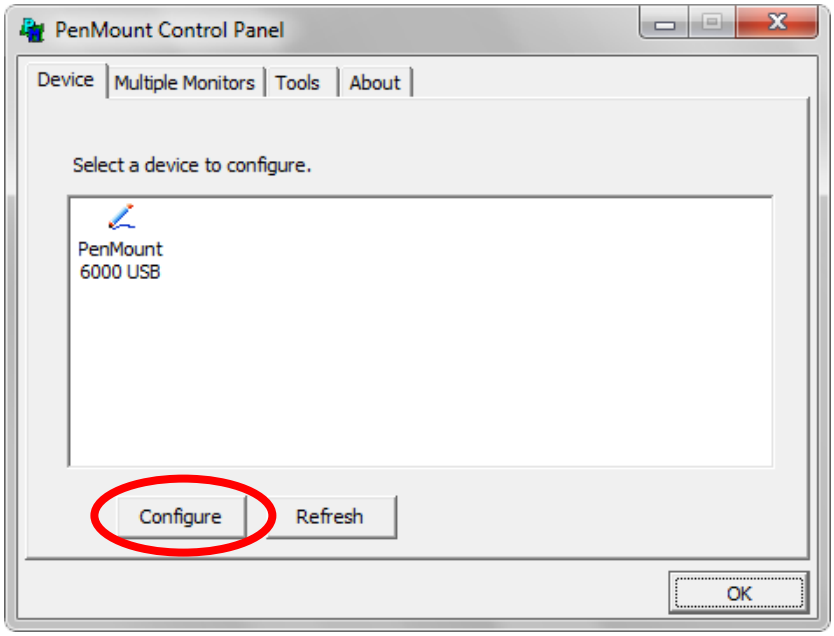
Calibration:

1. Right tap on the PenMount icon in the system stray.

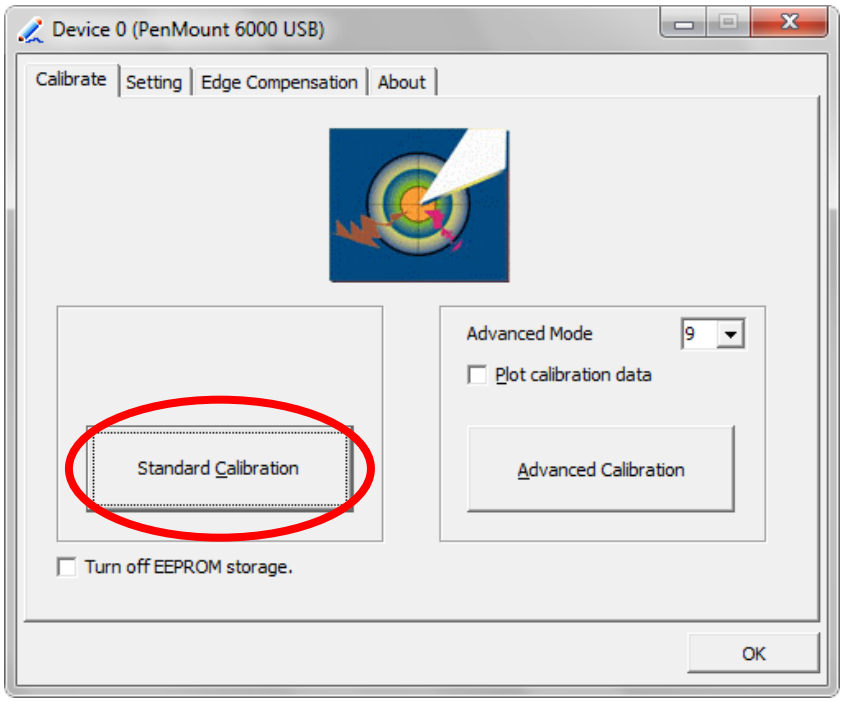
2. Select the PenMount Control Panel.



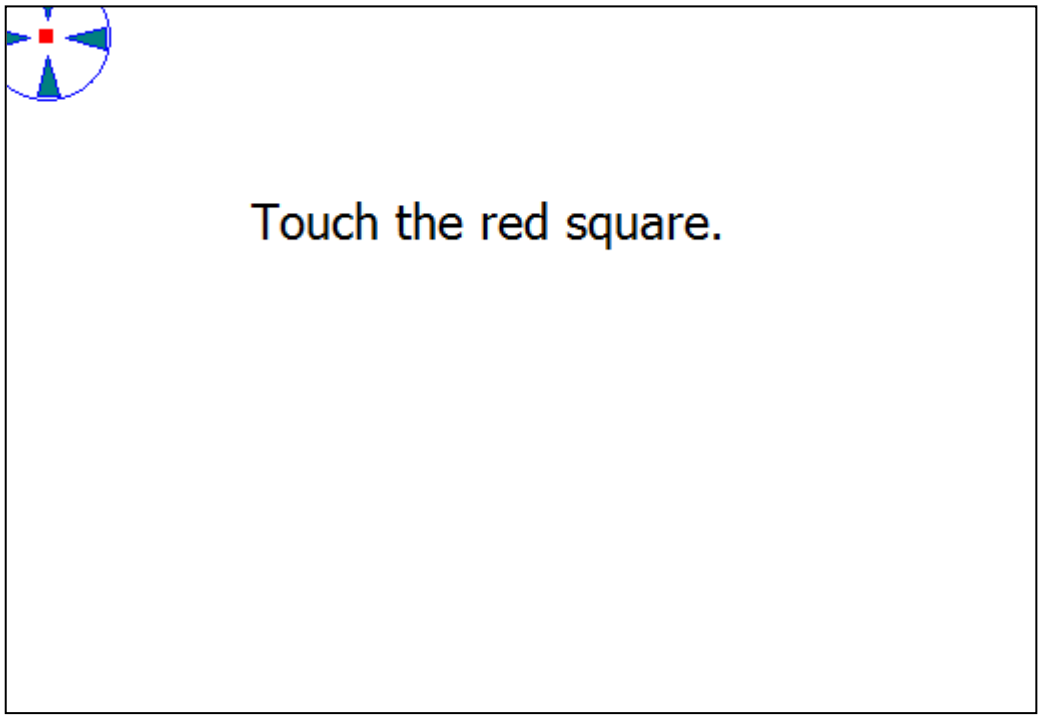
3. Chose the PenMount 6000 USB icon and tap the Configure button.



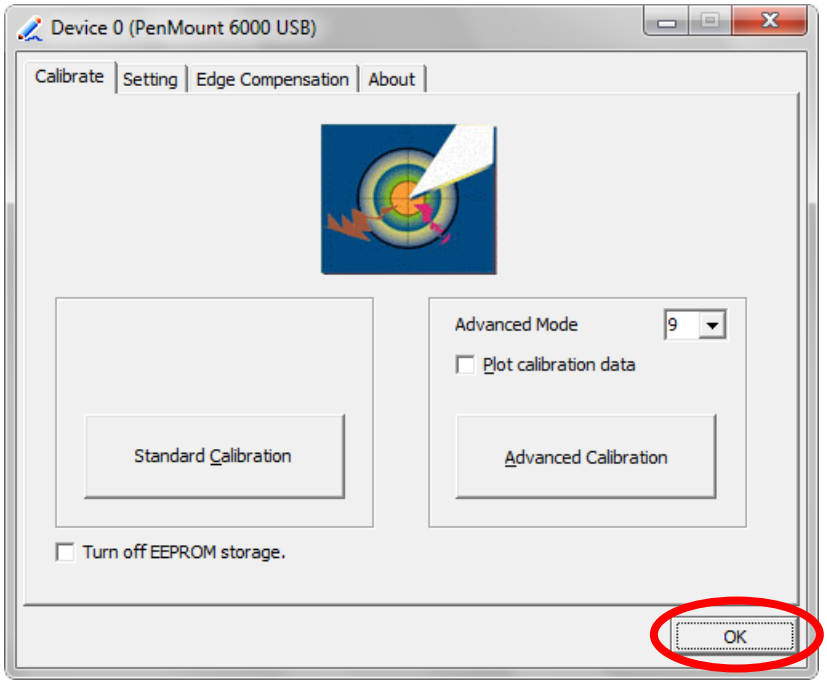
4. Tapping on the Calibration button will prompt the user to tap multiple points on the screen.



5. Hold the stylus naturally as if you were writing with a ball point pen, holding the stylus down on each red point as they appear. During calibration, position the terminal as close to the way you would use it.



6. After completion the screen returns to the Standard Calibration window. Selecting OK will save the settings. Tapping Standard Calibration will start the process again.



7. The calibration is now complete and the PenMount Control Panel window is displayed. Select OK to close the application down. The PM icon will still be present in the system tray for quick configuration should your touch screen need recalibration.

Do not write on the terminal display with ink pens or use other sharp objects that may damage the display.

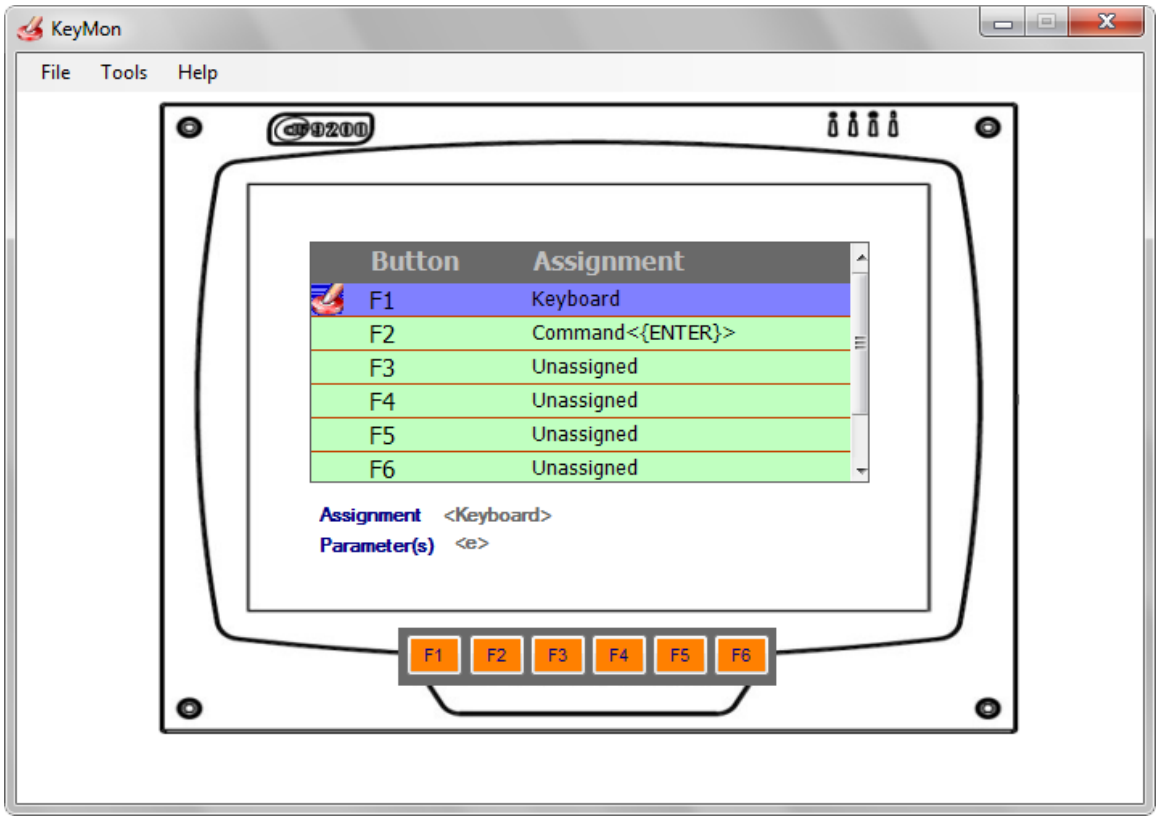
Using the Programmable Keys

The DLI 9200 has 6 integrated function keys. Each of the keys is user configurable via the DLI KeyMon Utility. The keys can be assigned to perform executable applications or to Data Ltd. predefined functions. The predefined functions are as follows: F1 assigned to DLI On-Screen Keyboard and F2 assigned to DLI Camera.

The DLI KeyMon utility can be launched from the system tray or from the **Start>Programs>DLI>DLI KeyMon**. The procedure below will assist you in defining the keys.

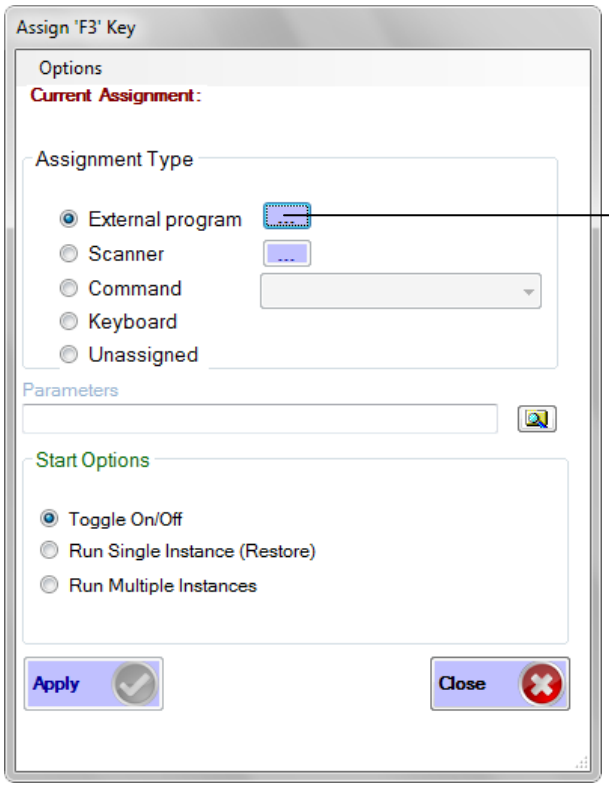
1. Double tap on the DLI KeyMon icon in the system tray

2. The DLI KeyMon screen is presented. Choose a key that requires a definition by tapping on the orange keys or by highlighting the key in the button assignment area and then double tapping.

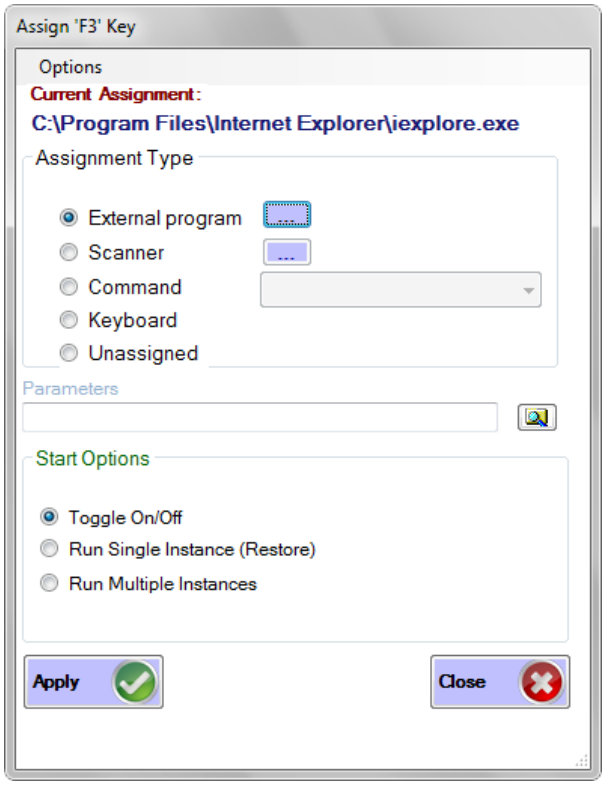


3. There are 5 options for key assignment. Choose an assignment type that is required for the key. Unassigned, Keyboard(OSK), Command, Scanner, External Program.

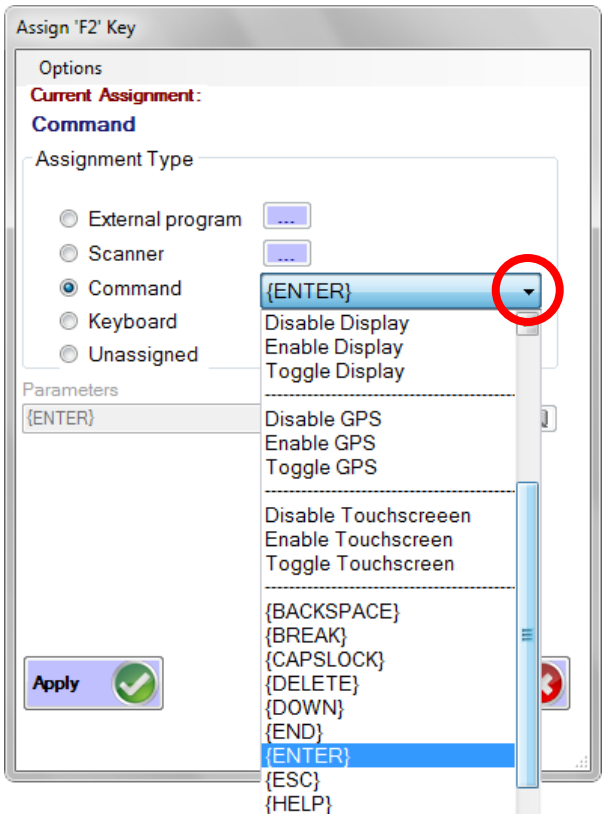
4. To assign an application choose **External program** and tap on the browser icon. (See page. 17)



5. The user is returned to the assign menu once the selection has been chosen from the browser icon. Selecting the apply button saves the change to the key. The path to the application will appear in blue below the Current Assignment:

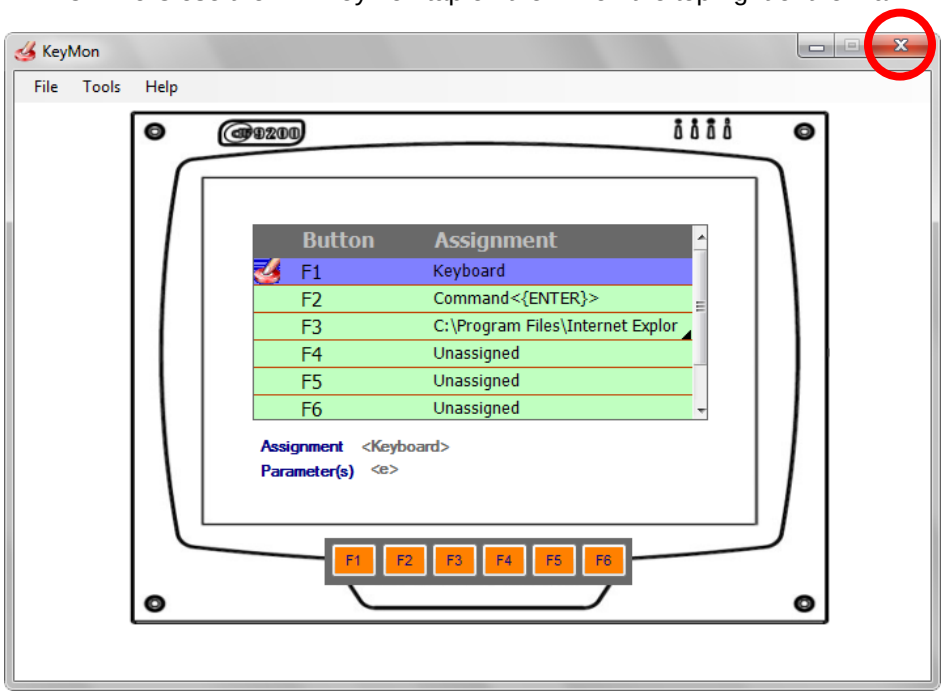


6. To select a predefined action or keystroke choose **Command** and tap the down arrow to display a drop menu.



7. The drop menu has a list of various actions and keystrokes to choose from. Once you have selected the command, tap the apply button to save.

8. To Close the DLI KeyMon tap on the “X” on the top right of the Main Window.



Using the WiFi Radio

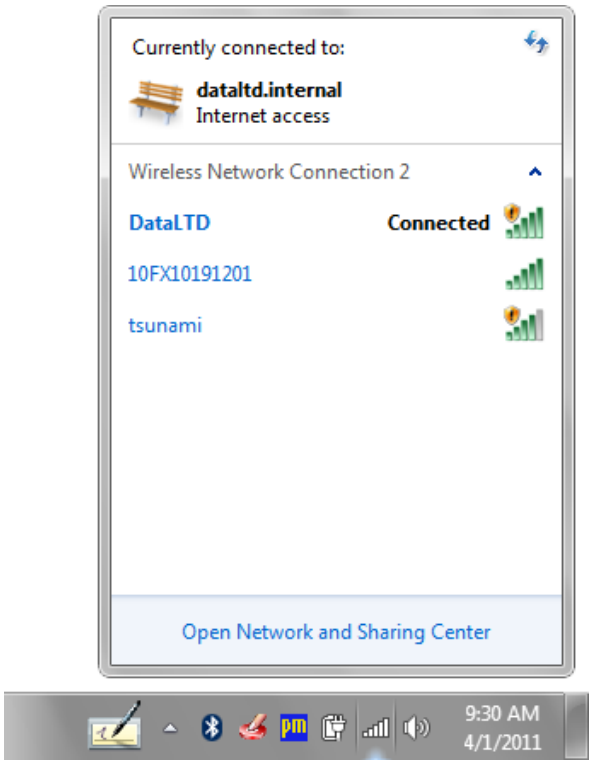
The DLI 9200 has a PCIe 802.11a/b/g/n integrated radio. In Windows 7 the radio is configured using the Windows Network and Sharing Center. With older versions of Windows the radio is configured by Intel PROSet. Please contact Technical Support (See page 30) if you have any questions configuring your radio. Windows provides the following features to Administrators and end-users:

- Connect or disconnect.
- View Available Networks and network mapping.
- Setup a new connection or network- Wireless, Wired, VPN connection or set up a router or access point.
- Connect and set up to a domain or workgroup.
- View Signal Quality and Speed.
- Troubleshoot problems – Diagnose and repair network programs, or get troubleshooting information.

Intel PCIe Integrated Radio

- The Network icon can be found in the task tray. It provides a graphical representation of your connection or signal quality.

- Tap the network icon on the taskbar to see all your wireless and wired options—Wi-Fi, mobile broadband, dial-up, or corporate VPN. One more tap, and you're connected.



- Selecting Open Network and Sharing Center will bring you to the window below. Here you can view your Network Map, your Active Networks, your Connection types and info. You can also set up new connections or networks. Enter a domain or workgroup and edit sharing options.

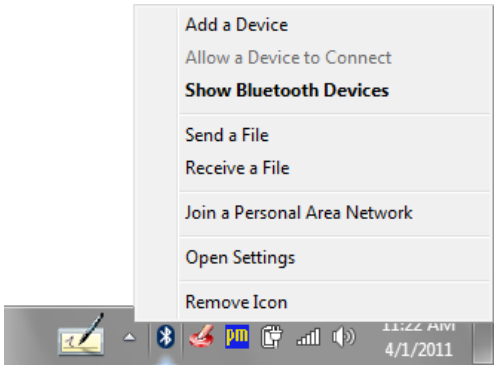
Using the Bluetooth Radio

The internal Bluetooth Class II wireless radio in the DLI 9200 is enabled by default. Microsoft™ Bluetooth software comes pre-installed on your terminal.

Pairing an Accessory to the DLI 9200
To pair a Bluetooth device to the DLI 9200 the icon in the system tray offers shortcuts to the Bluetooth Settings window; the Bluetooth File Transfer Wizard and the Add New Connection Wizard. Press and hold the stylus on the Bluetooth icon to open the Bluetooth device menu.



The following process is generally common for connecting most Bluetooth devices (keyboard, mouse, printer, cellular phone, PDA, Tablet PC, notebook PC, etc.). The actual steps may be slightly different for every type and brand of Bluetooth device. Read and follow the installation instructions included with your specific device. These are the four generic steps for connecting to a Bluetooth device.

1. Discover
2. Search
3. Pair
4. Connect

Discover
Making a Bluetooth device discoverable makes it visible to other Bluetooth devices. Each Bluetooth device uses a different method (pressing a button or key combination) to make it discoverable. This is generally described in the device's documentation. When you activate Bluetooth on your Tablet PC it is the signal for the Tablet PC to look for, or discover any Bluetooth devices within range.

Search
This process will find every Bluetooth device *that is discoverable and available for connection* within 33 feet (10 meters).

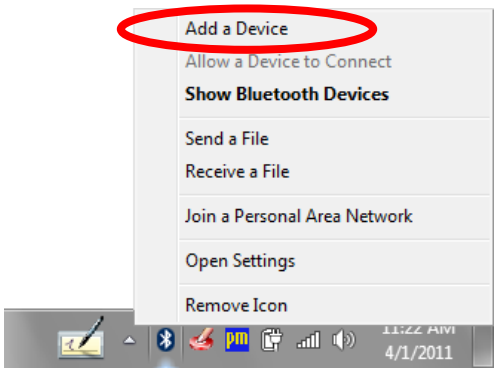
Pair
Using a passkey creates a secure connection (pairing) between the Tablet PC and Bluetooth device. This passkey helps prevent data from being intercepted and interpreted by another device.

Though the passkey exchange helps to secure your data, Bluetooth wireless technology should not be considered completely secure.

Connect
The first time a Bluetooth device is connected to the terminal the drivers are loaded for that device. After this initial connection, some Bluetooth devices may disconnect when they go into power-saving mode. Most will automatically reconnect when they become active again.

Using the Bluetooth Application

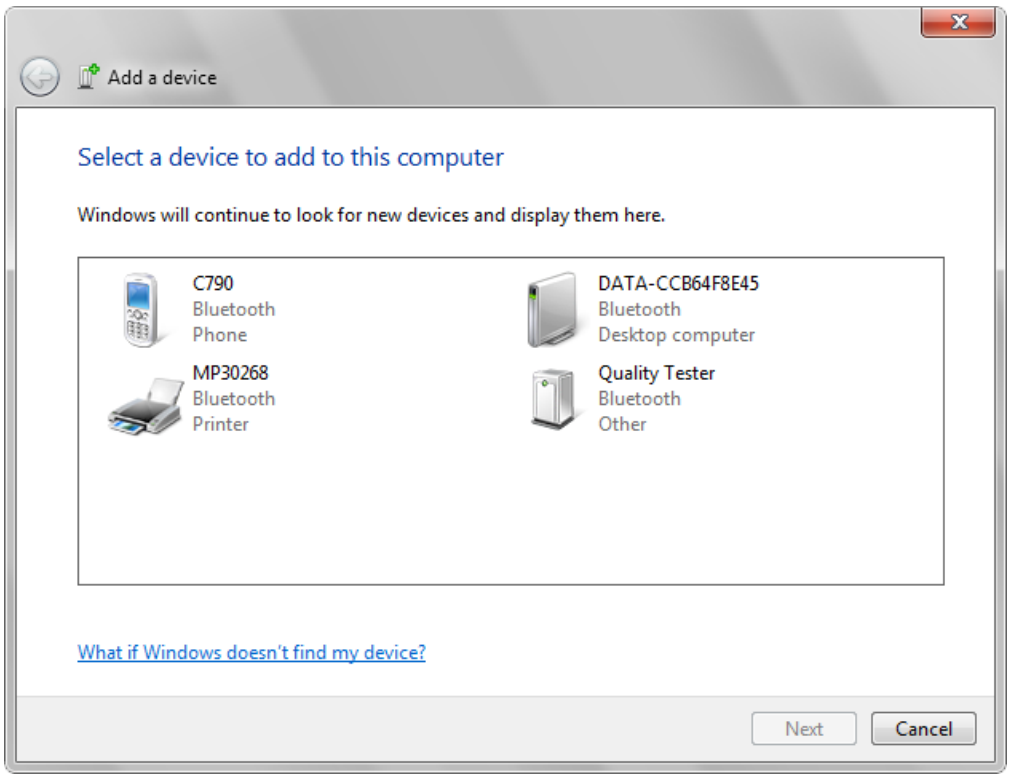
1. Make sure that either the Bluetooth indicator light is flashing or that there is a checkmark beside **Enable Internal Bluetooth Wireless Radio** (both indicate that Bluetooth is running)
2. Using your stylus, Right mouse click the **Bluetooth Devices** icon in the system tray.
3. Tap **Add a Bluetooth Device** to launch the Bluetooth **Add Bluetooth Device Wizard**.



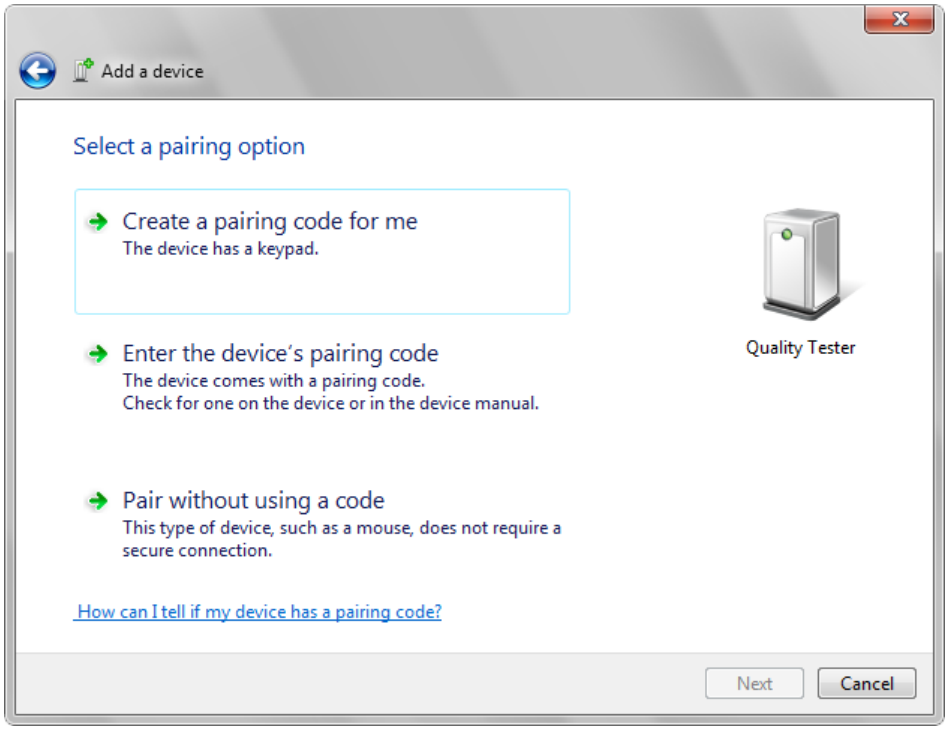
4. Place the Bluetooth device (headset, keyboard, printer, etc.) in discoverable mode.

Each Bluetooth device may have a different way to make it discoverable. Some have a small button on the headset or keyboard; others may require that you press a key sequence to invoke discovery. Look at the documentation that came with the Bluetooth device or visit the manufacturer's website for information.

5. After you make the Bluetooth device discoverable, it will show up in the wizard. Select the Bluetooth device and select Next.



6. Select the pairing option that best works for you Bluetooth device. This option will vary per device. You have a limited time after selecting Enter the device's pairing code to input the code. Select Next.



Add a device
Select a pairing option
Create a pairing code for me
The device has a keypad.
Enter the device's pairing code
The device comes with a pairing code.
Check for one on the device or in the device manual.
Pair without using a code
This type of device, such as a mouse, does not require a secure connection.
How can I tell if my device has a pairing code?

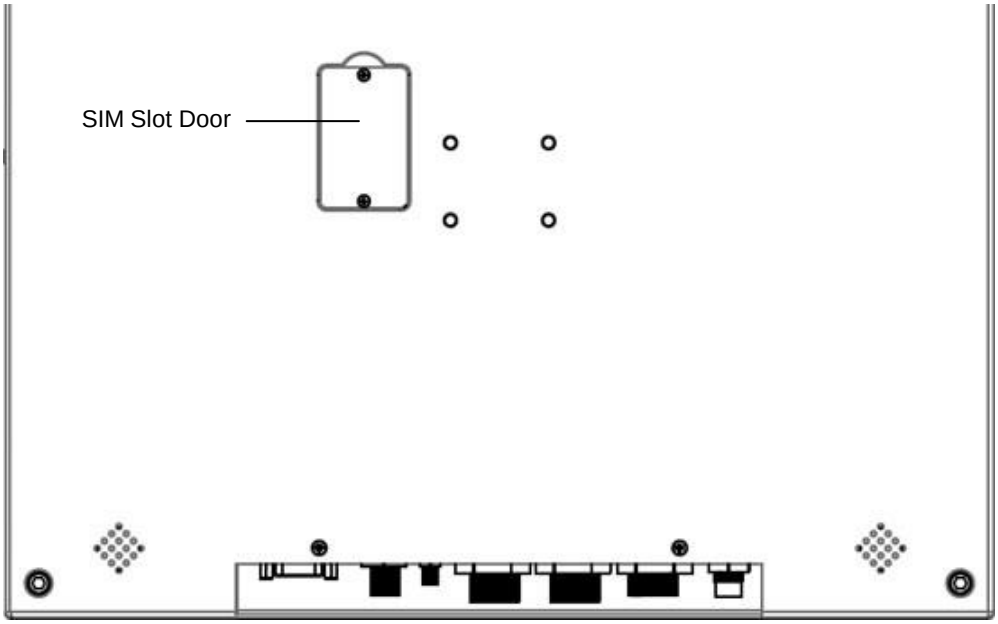
SIM Card Insertion

The SIM Card Slot is located in the back of the unit under a user accessible case cover. To access, remove back case cover (two phillip screws) then remove the plate cover (two phillip screws). The SIM Card Slot is intended for use of the MC8790 (GPRS Wireless Radio) **ONLY**. If you are unaware of what type of WWAN Radio you have please contact DLI Technical Support; (800) 526-1299 x774 or support@dataltd.com.

The unit must be power down prior to inserting the SIM card. Failure to do so may result in harm to the unit and the SIM.



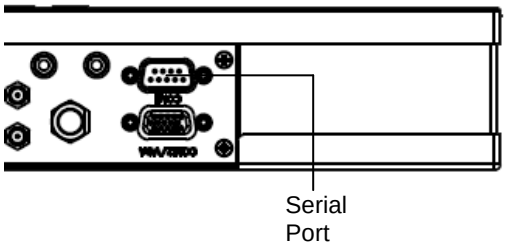
Back Panel

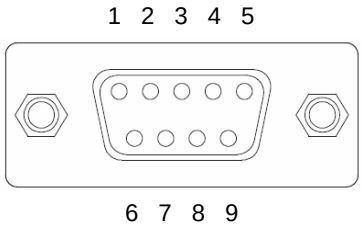
Using the RS-232 DB9M

The integrated RS-232 Port can be configured to work with many peripherals including Barcode Scanners, Printers, ODBII (Vehicle Interface), and Remote Monitoring apparatuses. To configure the RS-232 port so that the data is sent to the keyboard buffer the following procedure is required. This procedure is typically used when using an external barcode scanner on the device.

All DLI Devices have power to Pin 9.
DO NOT plug-in or unplug any serial devices while the DLI Device is powered on!

Bottom Panel





Pin	Description
1	DCD
2	TXD
3	RXD
4	DSR
5	GND
6	DTR
7	CTS
8	RTS
9	+5V

Using the GPS

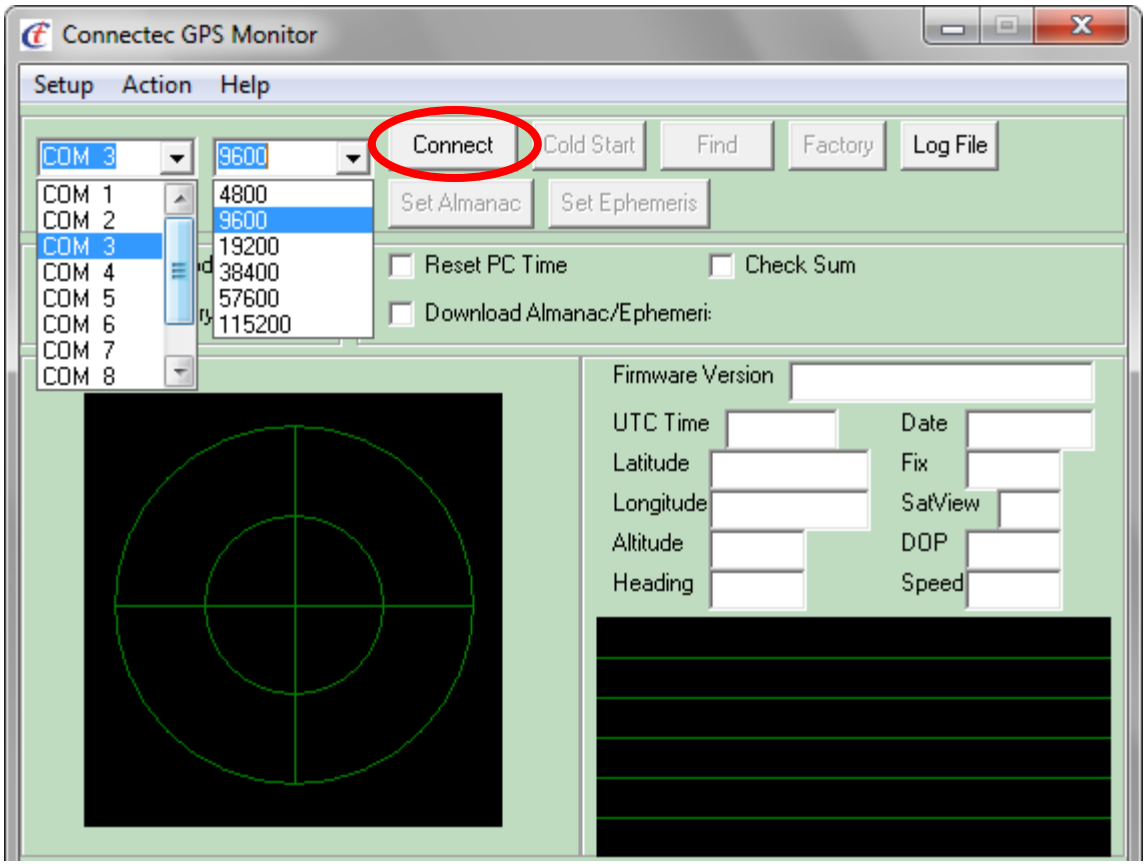
The optional GPS module with active antenna provides the SiRFstar III chip set and TTFF (Time to First Fix) technology which speeds the time to lock to a satellite. The Geohelix active antenna provides 25db gain. Along with each of these features Data Ltd's patent pending RF antenna switching technology provides you with the functionality of switching between external and internal antennas without software requirements.

Data Ltd has included in the DLI 9200 a GPS software tool to verify that all functions of the GPS module are working properly.

1. To launch the application tap on the **GPS** icon on the DLI 9200 desktop.

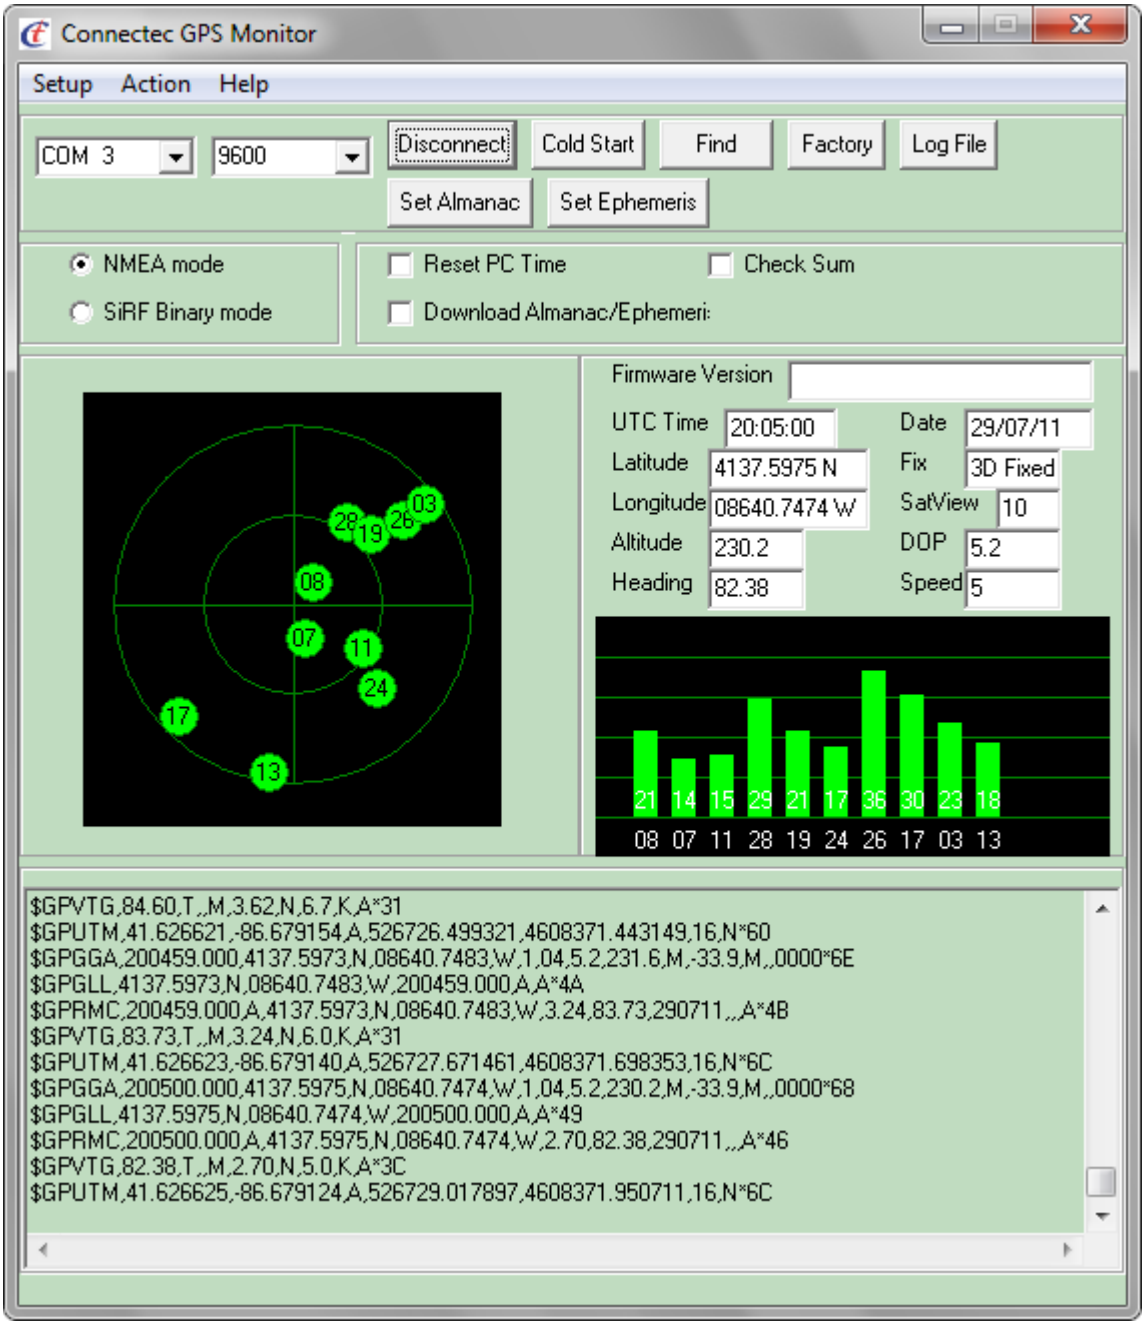
Connectec GPS Monitor can also be found under C:\Program Files\DLI

2. Set the COM Port to COM 3. This is the COM port that your GPS module is using. Set the Baud Rate to 9600. Next, tap the **Connect** button.



3. Once connected you can verify the Signal Quality, Satellite Location, Latitude, Longitude and Altitude. You can also view the Streaming NMEA data. You must be outside a building as GPS antennas do not work inside buildings.

The green bars indicate a lock to a satellite.



Installing Clearance & Airflow

Mounted to the back panel is a RAM-202U ball. Optional RAM mounting arms are available for a variety of secure options. Ask your Salesperson for more information on RAM Mounts. When selecting a location to mount the device, keep in mind that the power supply, RF connectors, and I/O are located on the bottom panel.

Please ensure that you give a minimum of 2.75 inches of clearance from the base of the unit. Proper cable routing and clearance will help with less strain on cables and connectors, while also allowing for better access to the ports.

Please ensure the device is mounted at all times and not laid down on the back panel. Make sure the device is given a minimum of 1.5 inches of clearance to allow for proper airflow.

Vehicle Installation

IMPORTANT!

Vehicle Power Connection

- **DLI devices must be installed pre-ignition (directly to battery terminals) with a 5 AMP in-line fuse.**
- **Failure to connect to battery terminals could damage the power conversion circuitry.**
- **For 24 volt to 48 volt systems, the DLI Surge Suppressor p/n: 5400020 is required.**

DC Converter: 10~60V Input		
Red		Positive
Black	Tie together	Ground
Yellow		

Please consult your fork truck manufacturer for proper installation instructions. DO NOT connect power to the hydraulics!

We recommend installation by trained service personnel only. The fuse should be installed in the positive lead within 5 inches of the battery positive (+) terminal.

Technical Assistance

If you need assistance installing or troubleshooting, please call your Distributor or the Data Ltd. Inc. Technical Support Office.

Shipping your DLI Device

Proper way to pack your DLI device

DO NOT ship any DLI Device without a proper UPS or FedEx container. The DLI Container is not meant for stand-alone shipping.

- Place device in foam cover as shown.

- Place the wrapped DLI device in the correct position in the spacer inside the DLI Container.

- Using a proper UPS or FedEx container, line the bottom with Bubble Wrap, Air Pillows, Packing Foam, etc.

The dimensions of the box shown are 27x17x10.

- Fill the rest of the Shipping Container with packing material.

- Place the closed DLI container inside the lined Shipping Container.

- Seal the Shipping Container and ship to:
  DLI
  5570 Lee Street, Suite 12
  Lehigh Acres, FL. 33971

Limited Warranty

Data Ltd. Inc. warrants its products to be free from defects in materials and workmanship and to conform to Data Ltd. Inc. published specifications applicable to the products purchased at the time of shipment. This warranty does not cover any product which is (i) improperly installed or used; (ii) damaged by accident or negligence, including failure to follow the proper maintenance, service, and cleaning schedule; or (iii) damaged as a result of (A) modification or alteration by the purchaser or other party, (B) excessive voltage or current supplied to or drawn from the interface connections, (C) static electricity or electro-static discharge, (D) operation under conditions beyond the specified operating parameters, or (E) repair or service of the product by anyone other than Data Ltd. Inc. or its authorized representatives.

This warranty shall extend from the time of shipment for the duration published by Data Ltd. Inc. for the product at the time of purchase ("Warranty Period"). Any defective product must be returned (at purchaser's expense) during the Warranty Period to Data Ltd. Inc.'s factory or authorized service center for inspection. No product will be accepted by Data Ltd. Inc. without a Return Materials Authorization, which may be obtained by contacting Data Ltd. Inc. In the event that the product is returned to Data Ltd. Inc. or its authorized service center within the Warranty Period and Data Ltd. Inc. determines to its satisfaction that the product is defective due to defects in materials or workmanship, Data Ltd. Inc., at its sole option, will either repair or replace the product without charge, except for return shipping to Data Ltd. Inc..

EXCEPT AS MAY BE OTHERWISE PROVIDED BY APPLICABLE LAW, THE FOREGOING WARRANTY IS IN LIEU OF ALL OTHER COVENANTS OR WARRANTIES, EITHER EXPRESSED OR IMPLIED, ORAL OR WRITTEN, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

DATA LTD. INC'S RESPONSIBILITY AND PURCHASER'S EXCLUSIVE REMEDY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT OF THE DEFECTIVE PRODUCT.

IN NO EVENT SHALL DATA LTD. INC. BE LIABLE FOR INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, AND, IN NO EVENT, SHALL ANY LIABILITY OF DATA LTD. INC'S ARISING IN CONNECTION WITH ANY PRODUCT SOLD HEREUNDER (WHETHER SUCH LIABILITY ARISES FROM A CLAIM BASED ON CONTRACT, WARRANTY, TORT, OR OTHERWISE) EXCEED THE ACTUAL AMOUNT PAID TO DATA LTD. INC. FOR THE PRODUCT. THESE LIMITATIONS ON LIABILITY SHALL REMAIN IN FULL FORCE AND EFFECT EVEN WHEN DATA LTD. INC. MAY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH INJURIES, LOSSES, OR DAMAGES. SOME STATES, PROVINCES, OR COUNTRIES DO NOT ALLOW THE EXCLUSION OR LIMITATIONS OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

All provisions of this Limited Warranty are separate and severable, which means that if any provision is held invalid and unenforceable, such determination shall not affect the validity of enforceability of the other provisions hereof.

Data Ltd. Inc., Inc. extends these warranties only to the first end users of the products. These warranties are non-transferable.

The limited duration of the warranty for the DLI 9200 is as follows:

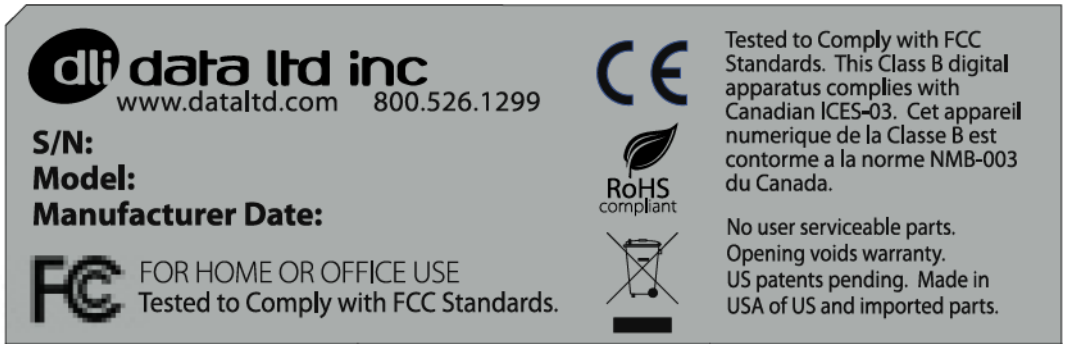
- DLI 9200 terminal with the integrated modules are covered by a one-year limited warranty.
- Touch screens are covered by a one-year limited warranty.
- The limited duration of the warranty for batteries is one year. Use of any battery not sold/ manufactured by Data Ltd. Inc. may damage the terminal and/or the battery and will void the warranty. Batteries returned to Data Ltd. Inc. in a reduced state may or may not be replaced under this warranty. Battery life will be greatly increased when following the battery instructions in the DLI 9200 User's Guide.
- Use of any peripheral not manufactured/sold by Data Ltd. Inc. will void the warranty. This includes but is not limited to: cables, power supplies.

Regulatory and Safety Approvals for the DLI 9200

DLI 9200 terminal meets or exceeds the requirements of all applicable standards organizations for safe operation. However, as with any electrical equipment, the best way to ensure safe operation is to operate them according to the agency guidelines that follow. Please read these guidelines carefully before using your DLI 9200 terminal.

Embedded Safety Information Text

The DLI 9200 has the following safety information on the back label of the terminal



data ltd inc
www.dataltd.com 800.526.1299

FCC ID: N7NMC8790

The CE Mark on the product indicates that the system has been tested to and conforms to the provisions noted within the 89/336/EEC Electromagnetic Compatibility Directive and the 73/23/EEC and 93/68/EEC Low Voltage Directive.

FCC Compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

If necessary, the user should consult the dealer or an experienced radio/television technician for additional suggestions. The user may find the following booklet helpful: “Something About Interference.” This is available at FCC local regional offices. Our company is not responsible for any radio or television interference caused by unauthorized modifications of this equipment or the substitution or attachment of connecting cables and equipment other than those specified by our company.
The correction is the responsibility of the user. Use only shielded data cables with this system. In accordance with FCC 15.21, changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter. To maintain compliance with FCC RF exposure guidelines for body-worn operation, do not use accessories that contain metallic components.

When using accessories where the terminal is worn on the body, the terminal’s touch screen must face away from the body.

CAUTION! *Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the equipment*.

Canadian Compliance

This Class B digital apparatus complies with Canadian ICES-003. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) installed outdoors is subject to licensing.

Cet appareil numérique de la Classe B est conforme à la norme NMB-003 du Canada.

For European Community Users

Data Ltd. Inc. complies with Directive 2002/69/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 27 January 2003 on waste electrical and electronic equipment (WEEE).

Waste Electrical and Electronic Equipment Information

This product has required the extraction and use of natural resources for its production. It may contain hazardous substances that could impact health and the environment, if not properly disposed.

In order to avoid the dissemination of those substances in our environment and to diminish the pressure on the natural resources, we encourage you to use the appropriate take-back systems for product disposal. Those systems will reuse or recycle most of the materials of the product you are disposing in a sound way.

The crossed out wheeled bin symbol informs you that the product should not be disposed of along with municipal waste and invites you to use the appropriate separate take-back systems for product disposal.

If you need more information on the collection, reuses, and recycling systems, please contact your local or regional waste administration.

You may also contact your supplier for more information on the environmental performances of this product.
